**Seva At Home Partners With Tessolve Semiconductor Pvt. Ltd. To Offer Its Employees Comprehensive Health Checkups**

*Seva At Home, a leading home healthcare provider in India, to offer diagnostic services to the employees of Tessolve.*

**Nashua, New Hampshire (16 May, 2022):** Seva At Home has announced that it has entered into a strategic partnership with Tessolve Semiconductor Pvt. Ltd., a semiconductor-manufacturing company headquartered in Bengaluru. Tessolve will leverage Seva At Home's doctor-partner network to sponsor comprehensive healthcare checkups for all its employees across 6 locations pan-India. Available to all full-time employees with immediate effect, the employees have the option of either choosing specific tests, or a comprehensive package that spans an array of medical and health parameters.

Depending on the nature of the tests and what the employee prefers, the tests will be carried out in the employee's home or at Seva At Home-verified diagnostic centres. The results of these tests will be communicated directly to the employee, and the Seva At Home team will assist with follow-ups, wherever requested. The employees also have the option of choosing the same health package for their family members at discounted rates through the Seva At Home platform.

By taking proactive healthcare measures, employers can expect enhanced productivity at the workplace and a higher level of satisfaction among the employees.

"We are proud to partner with Tessolve as they make the decision to support the health and wellbeing of their employees. These diagnostic tests will give the employees of Tessolve the information they need to take charge of their health and make informed decisions. We hope to see other workplaces make similar moves to support their employees," said Atul Kishore, Chief Revenue Officer at Seva At Home.

"Supporting our employees has always been our topmost priority—partnering with Seva At Home to offer these diagnostic services to them is an extension of our commitment to deliver excellence across fronts and to underscore the culture of trust, respect and dignity that is inculcated in the Tessolve workplace. We will continue to support our employees as they

navigate their individual health journeys,” said Mrs. Shuchi Shukla, Associate VP-HR, Tessolve Semiconductor Pvt. Ltd.

### **About Tessolve Semiconductor Pvt. Ltd.**

Tessolve offers a unique combination of pre-silicon and post-silicon expertise to provide full turnkey silicon and system solutions from design to production. The company is on track to be the world’s No. 1 semiconductor solutions company in the next five years. With 2600+ employees worldwide, Tessolve provides a one-stop-shop solution with complete hardware and software capabilities and advanced silicon and system testing labs. Tessolve continuously invests in its R&D Centres with specific initiatives in 5G, mmWave, Silicon Photonics, High-Performance Compute, System-level Test, Automotive Products, and others. Tessolve also offers end-to-end product design services in the embedded domain from concept to manufacturing under an ODM model with application expertise in Automotive, Industrial, Avionics, IoT, and Medical segments.
